SKILLS

Technical Skills HTML, CSS, JavaScript, GitHub, Python, SQL

Soft Skills Problem Solving, Adaptability, Organization, Leadership, Teamwork

LANGUAGES

Malayalam, English, Hindi

PROJECTS

Online Turf Booking System: Developed an online turf booking website as part of a group project during the sixth semester of my B.Tech program. Utilized HTML and CSS for frontend development, while Python was employed for backend functionalities. MySQL was integrated to manage the database. ([find source code](#))

Detection of Counterfeit Products Using Block chain: Contributed in a team project in my final year of B.Tech focused on detecting anti-counterfeit products and ensuring product identification and traceability across the supply chain. Spearheaded the design and implementation of a fully functional blockchain system aimed at preventing product counterfeiting. ([find source code](#))

Trek Trax - Travel Navigation Website: Independently designed the UI/UX interface for "Trek Trax," a conceptual website aimed at providing an immersive experience for outdoor enthusiasts. Leveraged HTML, CSS, and Bootstrap to create a user-friendly and visually appealing interface. Responsibilities included wireframing, prototyping, and implementing responsive design principles.
