PROFILE

My determination to succeed as a football scout, my willing to learn and to develop my skills in this role are guiding my daily life.
 I am continually working to acquire new skills, develop my personal network, and reinforce my understanding of the game and his modern trends.
 In a short time, I have gained an invaluable understanding of how to integrate with a club's existing philosophy and DNA, while also building my own approach to scouting and recruitment including data analysis.
 My current experience within a Multi-Club Ownership allows me to do benchmark analysis to recommend a player to the most suitable club. I also contributed to the takeover process of Valenciennes doing a depth squad analyse.
 Thanks to my passion for my job coupled with my rigor, I am sure I will have a positive impact on an ambitious club no matter the goals or system in place.
