INTRODUCTION

- Driven by a strong interest in football scouting and analysis, I have gained experience across two very different environments.
- At Leeds United I have had hands-on experience filming, live coding, and analysing academy games.
- At FC Midtjylland, I dealt with scouting focused work, identifying players, writing detailed reports and building scouting databases across the Belgian, French and Dutch markets.
- These combined experiences have given me a balanced foundation in both technical analysis and talent identification, and I am motivated to contribute to a high performance recruitment or analysis environment.

- Softwares: Creo, Tableau, Python, C++, Rstudio, Matlab, IBM SPSS, Catapult Focus, MS Office, Keynote, Hudl Sportscode, Wyscout, and Eyeball.
- Report writing, Presentation.
- Familiarity with Statsbomb, and Wyscout data

Work Experience

First Team Scout | FC Midtjylland 07/25 - 12/25

- Responsible for identifying players across Belgium, France and the Netherlands through consistent full game scouting and weekly performance monitoring. Tracked all potential targets over time and maintained a clear, organised scouting database using Streamlit.
- Submitted monthly Shadow Teams and highlighted profiles that matched FCM's identity.
- Prepared comprehensive player reports to support the club's recruitment decisions.
- Conducted thorough background checks and character assessments on potential new players checking for a strong mindset, stable support systems and a team-first attitude that aligned with the ethos of the club.

Junior Academy Analyst | Leeds United FC 11/24 - 06/25

- Filming and live coding academy games using Hudl Sportscode.
- Uploading and managing game footage on the platform for player and coach review.
- Designated Analyst for the U10s team, responsible for coding matches based on coach specifications to support player development.

Team Management Head | SSN Apex Racing 09/22 - 04/24

- Collaborated and led 20 plus different team members and raised Rs. 200,000 total in sponsorships, which significantly contributed to covering competition costs and logistics for the team.
- Partnered with cross-functional domains of the team to develop and build a cost-efficient kart, leading to a 20% decrease in kart manufacturing expenses.
- Set up a social media team to increase the team's visibility and presence in university, attracting a total of 5k views across Instagram and YouTube within the first 6 months post-launch.

EDUCATION

MSc. Sports Performance Analysis, Leeds Beckett University | SEP 2024 - SEP 2025
