## PROFESSIONAL PROFILE

Professional registered in the list of FIGC Sports Directors, with almost ten years of experience in the football field.

I have almost always held the role of DG in the amateur and professional fields. Effective management of economic and financial processes, attentive to company and brand growth strategies and the implementation of innovative projects. Expert in administrative and budget management. My expertise also includes logistical, infrastructural and commercial organisation, the marketing area as well as the management of relationships with bodies, competent offices, leagues and public administrations. I managed teams of people, ensuring direct supervision and an effective working environment.

During the year 2023, I invested significantly in my education, completing with excellent results and obtaining a scholarship for the thesis "Let's make football eco-sustainable",

the University of Teramo course in "Policies and Strategies of Football Clubs". This experience deepened my interest in sustainability in the world of football, offering me a unique perspective on how to integrate eco-sustainable practices into financial, social, environmental and sporting fields.

# Giuseppe Camicia
