As a Node.js developer with 8 month of experience, i specialize in building scalable web applications using technologies like Node.js, Express.js,Mysql,MongoDB. with strong foundation in backend development ,i have successfully created RESTful APIS, implemented complex business logic.and integrated with various database. My proficiency in MongoDB allows me to work with NoSQL database effectively.With a passion for clean code and continuous learning, i am committed to delivering high-quality solutions and contributing to the success of any project

WORK EXPERIENCE

○ Node Js Developer

NicheTech Computer Solutions Private Limited

06/2023 - Present

Achievements/Tasks

- Create clear, simple and reusable code.
- Develop server side APIS

PERSONAL PROJECTS

OUR TRAVEL APP

- Developed a user-friendly travel app enabling seamless trip creation and collaborative planning. Implemented Firebase Cloud Messaging for real-time notifications, ensuring timely updates on trip details. Integrated Nodemailer service for email notifications, enhancing communication channels. Users can invite members, create itineraries, and engage in real-time communication within the app, fostering a cohesive travel experience. Demonstrated technical proficiency and effective use of Firebase and Nodemailer in optimizing user engagement.

Technologies used:Node.js,Express.js and MongoDB

The Sustainable Fabrics

- Created a CMS website for sustainable bedsheets, incorporating category-based organization and price filters for user-friendly navigation. Implemented a visually appealing product display with multiple images showcasing variant colors. Engineered dynamic content sections for homepage, 'Our Story,' and 'Privacy Policy,' enabling easy updates. This project underscores proficiency in CMS development, efficient data management, and a commitment to sustainability within the specific context of bedsheets.

Technologies used:Node.js,Express.js and MySql
