MATCH ANALYST

I have always played sports in my life and I decided to undertaken specific studies to make my passion, my job. In the experience gained over the years, I have experienced different organizational contexts. I can adapt to the specific technical needs that this sector involves and I have developed and improved the use of specific equipment in the various sports, whether team or individual.

SKILLS

- Video presentation of opponents playing style to staff: description and discussion regarding solutions
- Analysis of individual opponents' characteristics: offensive strengths and defensive weaknesses. Conducting individual team meetings relating to these offensive tactics
- Together with the coach, managing individual video sessions: analysis of individual performance in the two phases of the game
- Live tagging match with possibility of end-of-half clip analysis and live communication with the bench

METHODOLOGY

- Transfer of video analysis to training sessions, comparison and suggestions for both collective and individual exercises, specificity on micro-cycle in preparation for the match.
- Identification of collective and individual technical-tactical errors with comparison/suggestions for corrective exercises.

STATISTICAL ANALYSIS

- Reporting of danger created and suffered by opponents, effectiveness of phases of play
- Team data analysis to frame match and in-depth analysis for both collective and individual periods.

VIDEO RECORDING

- Drone, pole, tripod, fixed and mobile automated systems.

ASSISTANT COACH

I specialized in set-pieces stretegies with important "numbers" in both phases.
