To Whom It May Concern,

I am writing this letter of recommendation for Pedro Satorre Mulet, who recently completed his master's thesis titled "Shot Classification & Goal Probability Estimation Using Graph Neural Networks." I have had the pleasure of serving as Pedro's advisor throughout the duration of his thesis project, which he conducted as a project for Hertha BSC.

Pedro's thesis was a remarkable demonstration of his exemplary skills in both machine learning and football analytics. He applied state-of-the-art machine learning algorithms to a comprehensive set of broadcast-based tracking data, producing insightful results in the realm of goal probability estimation. His work showcased a deep understanding of complex statistical methods and their application in the context of football analytics.

One of Pedro's most notable strengths is his proficiency in coding (Python). Throughout the course of his project, he consistently demonstrated his ability to write clean, efficient code to tackle challenging problems. His coding skills were instrumental in implementing sophisticated machine learning models.

Moreover, Pedro exhibited a high degree of independence and initiative in his work. He was able to navigate the project requirements with minimal guidance, demonstrating a keen ability to identify and prioritize relevant tasks. His aptitude for self-directed learning allowed him to quickly familiarize himself with the pertinent literature and adapt cutting-edge methodologies to address the research questions at hand.

Based on his performance, I have no doubt that Pedro would be a valuable asset to any football club or organization seeking expertise in data analytics and machine learning. His combination of technical proficiency, analytical acumen, and passion for football make him exceptionally well-suited for roles that involve leveraging data to drive performance and strategic decision-making.

In conclusion, I wholeheartedly recommend Pedro without reservation. He is a highly talented and motivated individual who has demonstrated his capability to excel in challenging environments. I am confident that he will continue to make significant contributions wherever his career may take him.

Please feel free to contact me if you require any further information regarding Pedro's qualifications or his thesis project.

Sincerely,

Gabriel Anzer
